

Boost Students' Civic and Statistical Literacy: Discover Classroom Resources with the U.S. Census Bureau

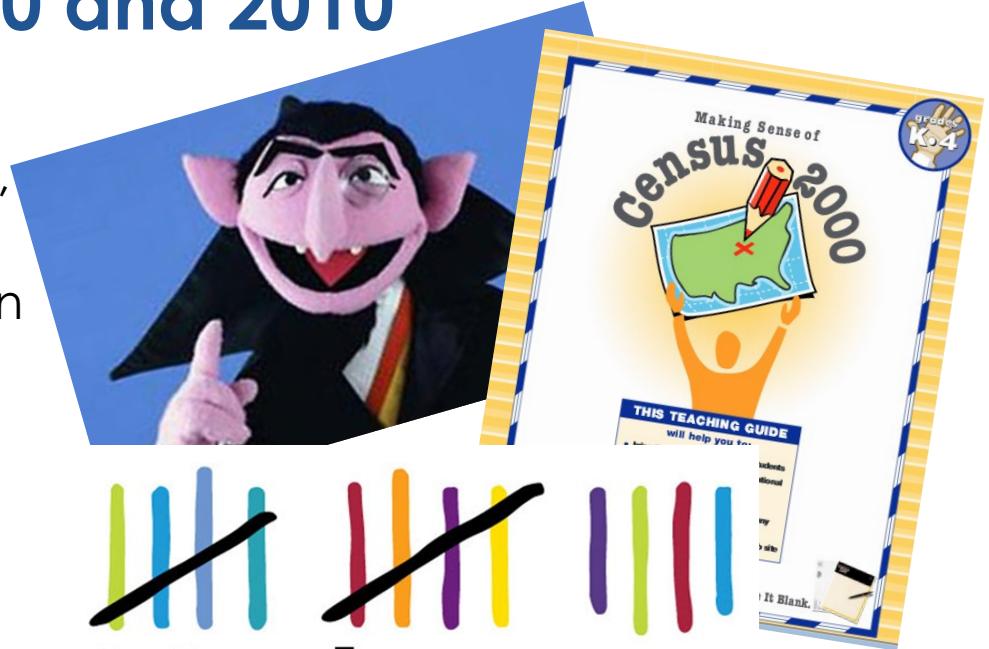

Agenda

- What is the Statistics in School (SIS) Program?
- Activities Overview
- Additional SIS Resources
- Spreading the Word

Census in Schools 2000 and 2010

K-12 program in the U.S., Puerto Rico, and the Island Areas (Guam, American Samoa, the Northern Mariana Islands, and the U.S. Virgin Islands)

- Printed maps
- Kits and lessons
- CIS Week materials
- Family take-home pages

It's about us
2010 CENSUS IN SCHOOLS

What is Statistics in Schools?

- Statistics in Schools (SIS) is an education program fueled by the U.S. Census Bureau and created by teachers, for teachers.
- The program leverages census data to create engaging, free, and easily downloadable classroom activities for students in grades K through 12.
- SIS is an ongoing program that teachers across the country have been using since 2014, with more than 200 available resources.

SIS Program Goals

- Educate the public, specifically by improving statistical literacy of students.
- Demonstrate applicability and utility of statistics and statistical concepts in educational activities.
- Increase the Census Bureau's brand recognition.
- Improve the public's familiarity with the work of the Census Bureau.
- Encourage public cooperation in Census Bureau surveys and censuses.

Statistics in Schools Activities

- English
- Math
- Social Studies
- Geography
- Sociology

LINEAR MODELS - POPULATION GROWTH IN FIVE STATES
TEACHER VERSION

Subject Level:
Middle School Math

Grade Level:
8

Approx. Time Required:
45-60 minutes

Learning Objectives:

- Students will be able to examine a linear model to estimate the slope and y -intercept.
- Students will be able to interpret the slope and y -intercept.
- Students will be able to understand how bivariate data can be simplified to make a linear model.

United States Census Bureau

Classrooms Powered by Census Data

STATISTICS IN SCHOOLS

English Activities

- **Elementary School**

Narratives and Names: This activity serves as an introduction to a narrative writing assignment. Teachers give students an overview of the Census Bureau and students complete a quick write about their name and its history.

- **Middle School**

Numbers That Tell a Story: Using the State Facts for Students data tool, students explore data about their state and voice their opinions on how the population has changed over time.

- **High School**

"To Kill a Mockingbird" - An Introduction to 1930s America: This activity teaches students about the setting of Harper Lee's famous novel "To Kill a Mockingbird," which takes place during 3 years (1933–1935) of the Great Depression.

Top 15 Most Popular Last Names in the U.S. by Rank

Year	Last Name														
1990	Smith	Smith	Johnson	Johnson	Williams	Brown	Jones	Miller	Davis	Garcia	Rodriguez	Wilson	Martinez	Lopez	Concepcion
2000	Smith	Johnson	Williams	Johnson	Williams	Jones	Brown	Miller	Davis	Garcia	Rodriguez	Hernandez	Hernandez	Lopez	Wilson
2010	Smith	Johnson	Williams	Johnson	Williams	Jones	Brown	Miller	Davis	Garcia	Rodriguez	Hernandez	Hernandez	Lopez	Concepcion

**"TO KILL A MOCKINGBIRD": AN INTRODUCTION TO 1930S AMERICA
TEACHER VERSION**

Learning Objectives:

- Students will be able to read census data to describe the unemployment numbers from the 1930s.
- Students will be able to analyze the 1930s setting and conflict in "To Kill a Mockingbird".
- Students will be able to use the 1930s data and the novel to enhance their understanding of 1930s America and an understanding of the Great Depression.
- Students will be able to analyze the major events occurring during this time period in relation to the first 2 chapters of "To Kill a Mockingbird".

History/Social Studies Activities

- **Elementary School**

"I Have a Dream" – Learning About Martin Luther King Jr.: Students analyze census data and graphs that demonstrate how certain aspects of the lives of African-Americans have changed since civil rights leader Martin Luther King Jr. delivered his "I Have a Dream" speech in 1963.

- **Middle School**

Voting Trends in America, 1964-2020: Students will analyze bar and line graphs showing the percentages of people (by race, age, sex, region, and education) who voted in elections between 1964 and 2020.

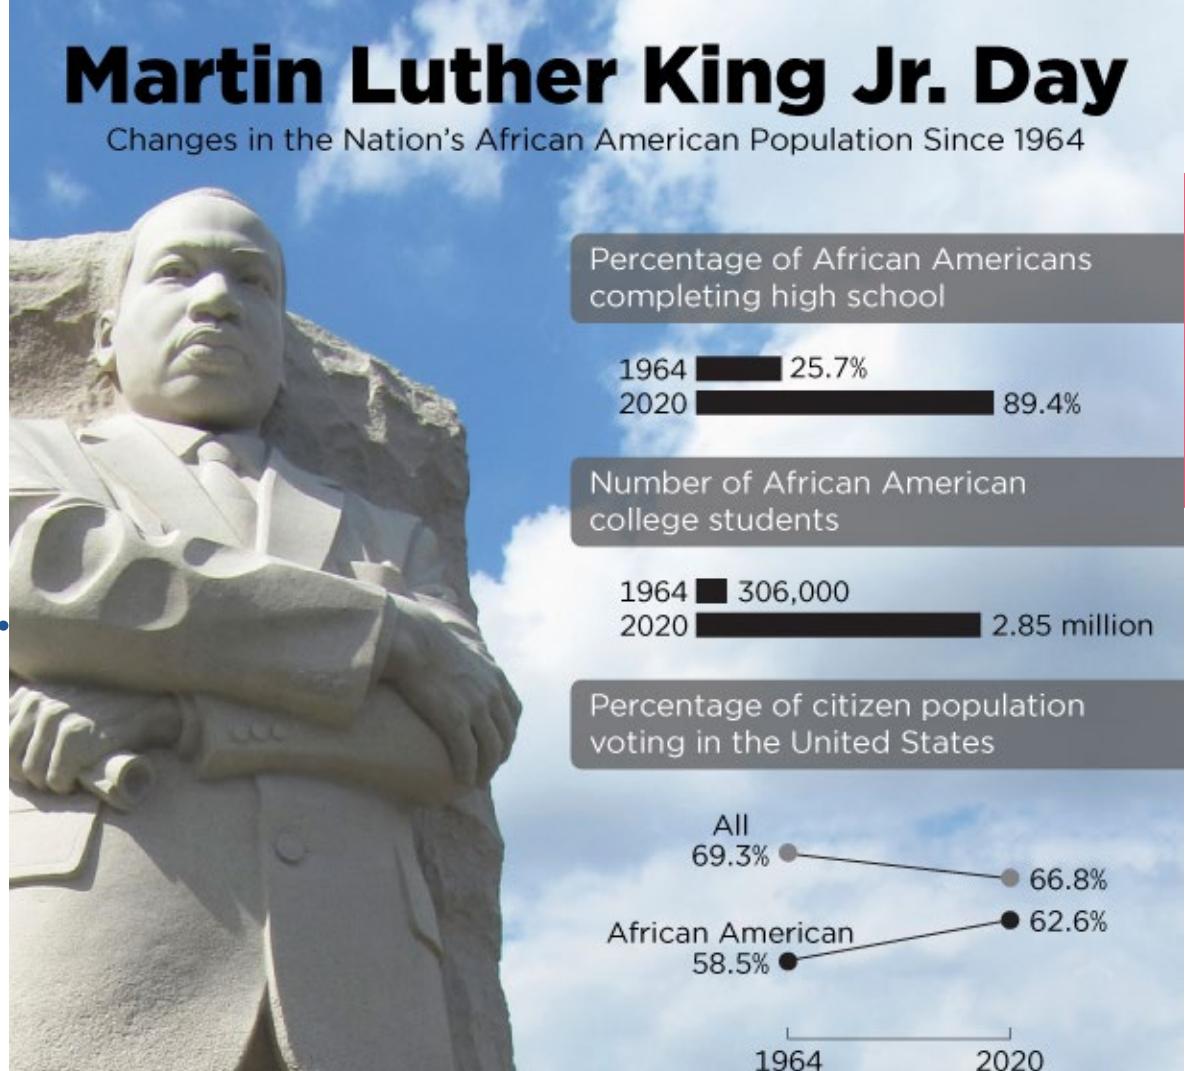

- **High School**

The Progressives and the 1920 Census: Students interpret and analyze a political cartoon about the 1920 Census to better understand how the census was related to the Progressive movement of the early 20th century.

Quick Glance: “I Have a Dream” Learning About Martin Luther King Jr.

Math Activities

- **Elementary School**

Changes in My State: Students learn about their state as they collect and organize business information using State Facts for Students, a U.S. Census Bureau data tool.

- **Middle School**

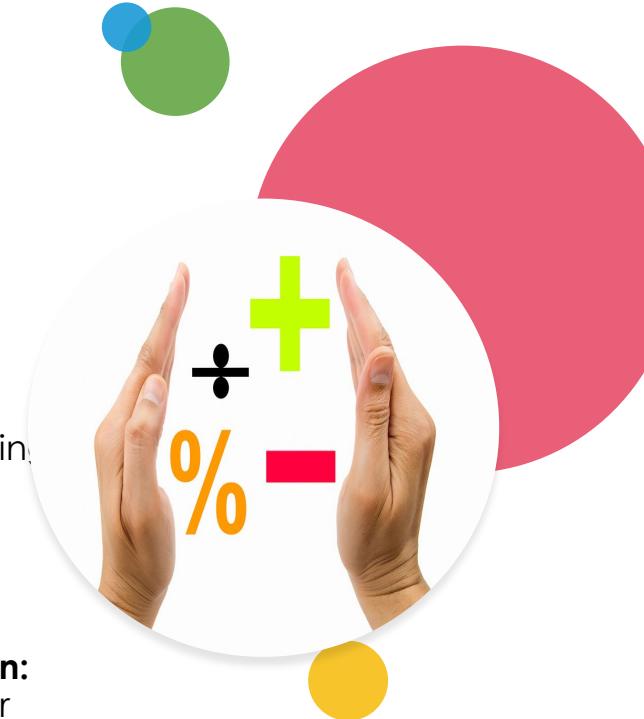

Fitting a Line to Data - Earnings and Educational Attainment:

Students investigate census data on the relationship between earnings and different levels of educational attainment by creating a scatter plot, adding an approximate line of best fit to the plot, and judging the line's accuracy.

- **High School**

Analyzing Relationships: Marriage, Divorce, and Linear Regression:

Students examine census data on marriage and divorce rates for women and men in each state and the District of Columbia.

A Child's Day: At a Glance

What does a child's day look like? Statistics from the U.S. Census Bureau's Survey of Income and Program Participation look at children's participation in extracurricular activities and academic programs as well as their interaction with their parents.

Extracurricular Activities

Boys aged 6 to 17

47 out of every 100 Sports

25 out of every 100 Lessons

26 out of every 100 Clubs

Girls aged 6 to 17

36 out of every 100 Sports

36 out of every 100 Lessons

31 out of every 100 Clubs

Living With Siblings

59 out of every 100 children

live with only biological or adopted siblings.

11 out of every 100 children

live with only half or step siblings.

22 out of every 100 children

live with no siblings.

Reading

5 times

Average times

children 3 to 5 years old

were read to in the past week.

Academic Experiences

29 out of every 100

children aged 12 to 17

enrolled in gifted classes

15 out of every 100

children aged 6 to 11

enrolled in gifted classes

Meals

81 out of every 100

children ate dinner with a parent at least 5 days per week.

Outings

83 out of every 100

children under 6 years old

went on 2 or more outings

per week with a parent.

Geography Activities

- **Elementary School**

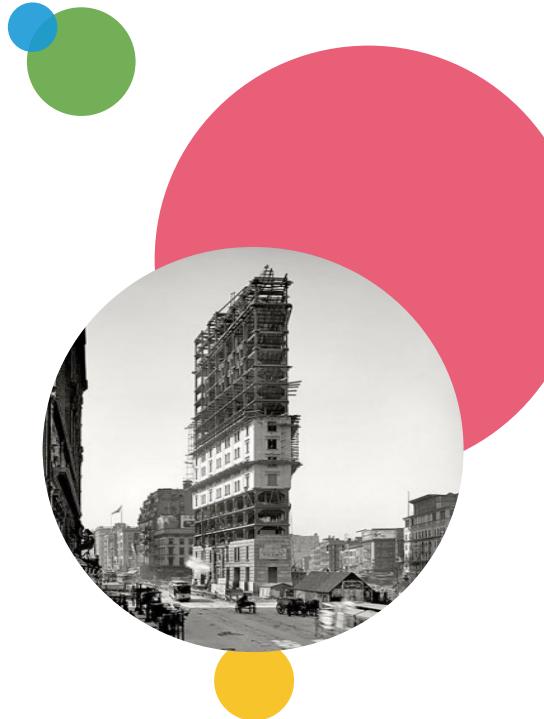

Examining Changes to the Environment Through Pictures and Data:

Students examine how human actions and population changes can affect the environment by examining a series of photographs that compare famous landmarks across time.

- **Middle/High School**

Analyzing Correlations of Education and Income: Students

explore maps containing census data from 1950 through 2000 and analyze how education levels and median household incomes have changed over time.

Quick Glance:

Examining Changes to the Environment Through Pictures and Data

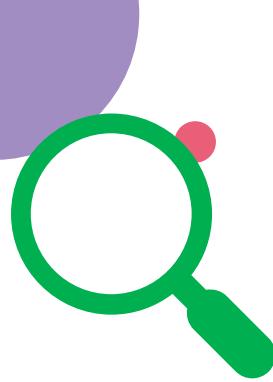

Photo 1: Times Square 1903

Photo 2: Times Square 2014

Quick Glance:

Examining Changes to the Environment Through Pictures and Data

Item 1: New York City, NY

Category	Historical Data	Current Data
Number of houses	249,991 (1900)	3,618,635 (2020)
Number of businesses	39,776* (1900)	205,592 (2017)
Population	3,437,202 (1900)	8,804,190 (2020)

*Business data in 1900 count only manufacturers (companies who create products), not all retail or service businesses.

Sociology Activity Examples

Poverty in America

- Students will explore census data, including infographics and reports, to better understand rates of poverty in the nation.

The Modern Family: Changes in Structure and Living Arrangements in the United States

- Students will learn why families are important social institutions and how family structures, household sizes, and living arrangements have changed substantially since the 1970s.

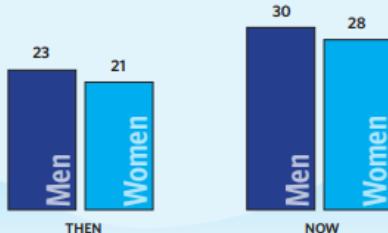

Quick Glance: How Times Have Changed: An Analysis of Young Adults

Young Adults: Then and Now*

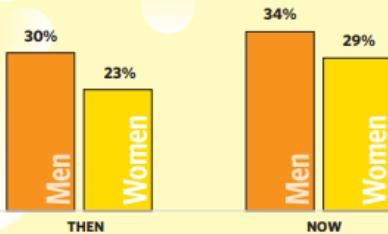

(*aged 18-34; 1970 and 2022)

Young adults today are marrying later in life.

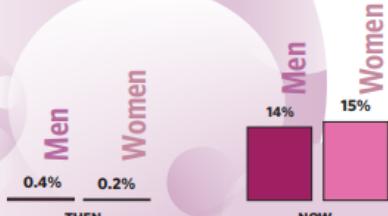

Median age at first marriage

More young adults are living at home with their parents.

More young adults are living with a boyfriend or girlfriend.

State Facts for Students

**United States®
Census Bureau**

State Facts for Students Explorer

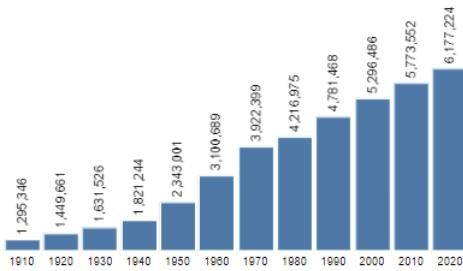

Discover cool stuff about your state, territory, and the country.

Start by selecting a location from the drop-down menu. Then, hover over the images to explore facts unique to that geography, like the population of kids in your state, capitals, businesses (such as zoos and amusement parks), and more. When you are done exploring, view and print data tables and graphs.

To find more state facts and related resources, visit the [Statistics in Schools](#) site!

The figure is a colorful, interactive map of Maryland. A winding black road starts from the bottom right and curves through the state. Along this road are several circular icons representing different school-related topics: a car, a dumbbell, a pinwheel, a hamburger, a hippo, a soccer ball, a tent, a tooth, a book, a train, and an ice cream cone. To the left of the road, there are four callout boxes with arrows pointing to specific locations on the map: "History" (top left), "Geography Facts" (middle left), "Kids My Age" (bottom left), and "I Never Knew That!" (far bottom left). In the bottom right corner, there is a black circle containing the text "View Tables & Charts". The background features a green landscape with trees and hills. At the top, there is a header "Select a location and GO!" with a dropdown menu set to "Maryland". The bottom left corner features the "United States Census Bureau" logo, and the bottom right corner features the "STATISTICS IN SCHOOLS" logo.

Population (1910–2020)

Kids My Age		2010	2019
8-year-olds	Total	73,171	75,067
	Boys	37,292	38,384
	Girls	35,879	36,683
9-year-olds	Total	75,682	74,804
	Boys	38,703	38,205
	Girls	36,979	36,599
10-year-olds	Total	75,680	73,727
	Boys	38,445	37,528
	Girls	37,235	36,199
11-year-olds	Total	75,343	76,574
	Boys	38,275	38,981
	Girls	37,068	37,593
12-year-olds	Total	74,958	76,406
	Boys	38,515	39,379
	Girls	36,443	37,027
13-year-olds	Total	75,862	75,370
	Boys	38,284	38,442
	Girls	37,578	36,928
14-year-olds	Total	77,186	75,237
	Boys	39,549	38,095
	Girls	37,637	37,142

State Facts for Students: Maryland

Fun Facts

- Student-friendly handouts that tie Census Bureau statistics to holidays, anniversaries, and other observances.
- Designed to be used at varying grade levels and across different subjects.
- Teaching guide with suggested activity ideas for each grade band.

Education on the Rise

Percent of the Black population 25 and over who completed high school or college:

- 2022 - **90%**
- 2021 - **90%**
- 2020 - **89%**
- 2010 - **84%**
- 2000 - **79%**

Black-Owned Businesses

161,031 - The number of Black-owned businesses.

The Health Care and Social Assistance sector (includes dentist and doctors' offices) had the highest number (**45,015**) of businesses with majority Black ownership, making up **30.0%** of all Black-owned businesses.

Population

About 14% or 45 million - The number of Black or African American people in the United States in 2022. These places have among the highest percentage of residents for this racial group:

What's the Age?

Roughly 35 years - The median age of the Black or African American population in 2022.

Occupations

Held by Black people 16 years old and older:

- **About 3 out of 10** (35%) work in management, business, science, and arts occupations (includes elementary and middle school teachers, education administrators, architects, and physicians).
- **About 2 out of 10** (21%) work in service occupations (includes police officers, janitors, and hairdressers/barbers).
- **About 2 out of 10** (21%) work in sales and office occupations (includes receptionists, mail clerks, and library assistants).
- **About 2 out of 10** (19%) work in production, transportation, and material moving occupations (includes painting workers, bus drivers, and packers/packagers).

Birthplace Populations of Famous African Americans

- **Malcolm X** - Omaha, Nebraska (Pop. - **486,051**)

American Black Muslim minister and human rights activist who was a prominent figure during the civil rights era.

- **Maya Angelou** - St. Louis, Missouri (Pop. - **301,578**)

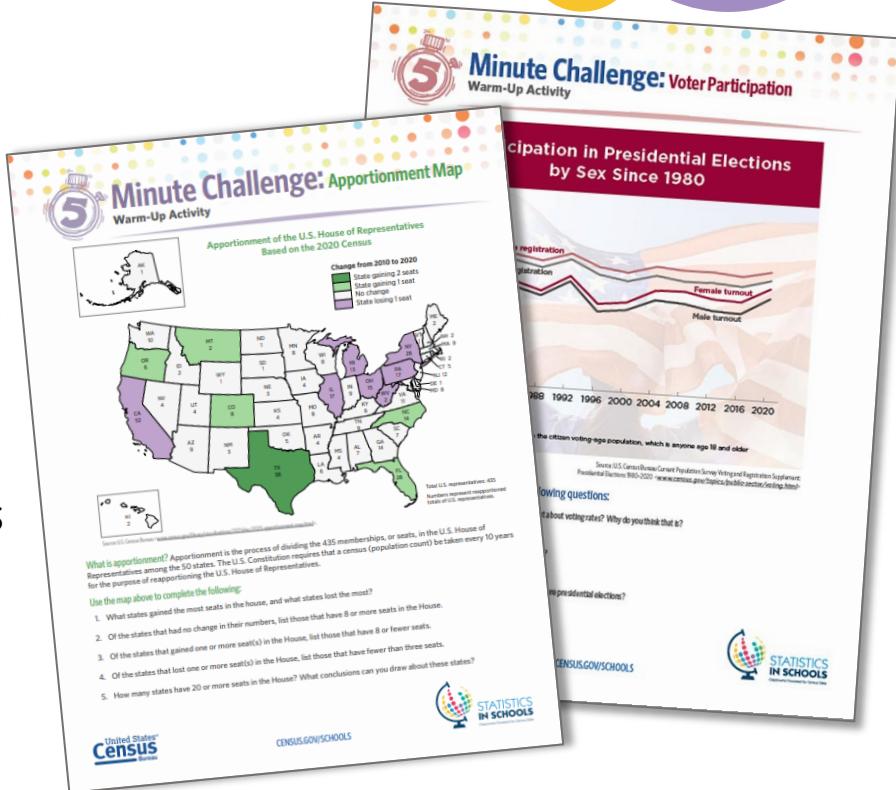

Her work as an accomplished poet, memoirist, playwright, and civil rights activist has been widely recognized.

- **Arthur Ashe** - Richmond, Virginia (Pop. - **226,610**)

First Black player selected to the U.S. Davis Cup team; only Black man ever to win the singles title at Wimbledon, the U.S. Open, and the Australian Open.

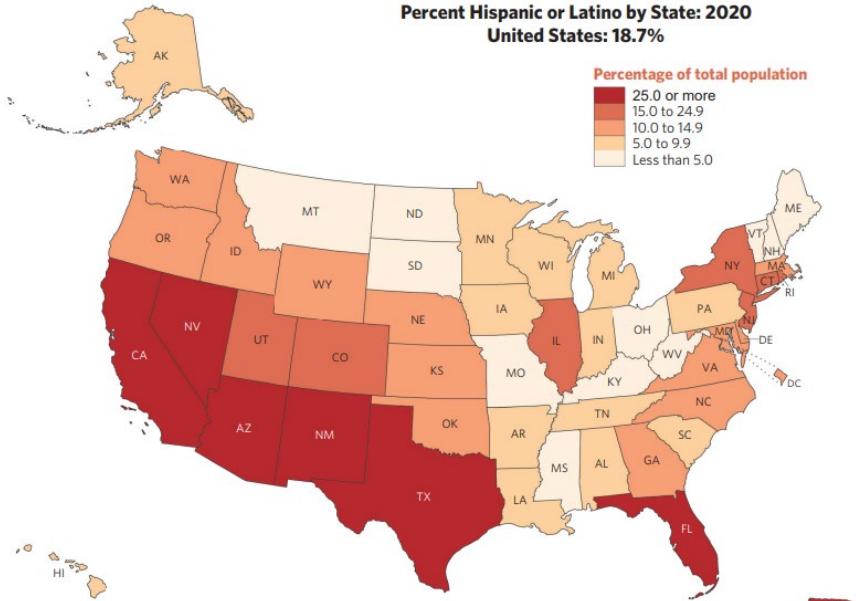

5 Minute Challenge Warm-Up Activities

- What Is the Hispanic or Latino Population in Your State?
- Apportionment Map
- Exploring Centers of Population Through the Decades
- Honoring Those Who Served
- How Many U.S. Representatives Does Your State Have?
- Voter Participation

5-Minute Challenge:

What is the Hispanic or Latino Population in Your State?

Question Examples:

1. How many states had Hispanic or Latino populations that accounted for 25.0 or more percent of their total population?
2. How many states had Hispanic or Latino populations that made up only a 5.0 percent or less portion of their population?

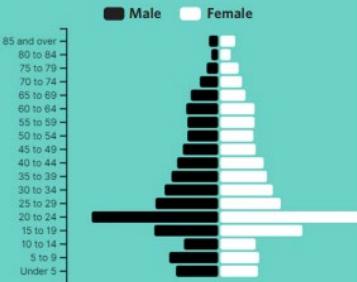

5 Minute Challenge:

Exploring Population Pyramids Across U.S. College Towns

Sample Newsletter Blurs

Sample 1:

'Tis the Season for Statistics!

Get your students into the holiday spirit with free holiday-related stats and resources from the U.S. Census Bureau's Statistics in Schools (SIS) program.

Students will discover festive Census data like the populations of Santa Claus, Indiana, and Rudolph, Wisconsin, and more with resources that enhance learning in a variety of subjects. Get started with SIS today at census.gov/schools.

CENSUS.GOV/SCHOOLS

This sample newsletter blur features a white background with a thin blue border. At the top left is the Statistics in Schools logo. In the top right is the United States Census Bureau logo. The main headline reads "'Tis the Season for Statistics!'". Below it is a sub-headline: "Get your students into the holiday spirit with free holiday-related stats and resources from the U.S. Census Bureau's Statistics in Schools (SIS) program." A "Learn More" button is located at the bottom right of this section.

STATISTICS
IN SCHOOLS

Greetings SIS Ambassadors!

What do women, Pi, and four-leaf clovers all have in common? March! In this quarterly newsletter, you'll discover new free learning tools from ready-to-play Kahoot! games for Women's History Month and Irish-American Heritage Month to math activities for Pi Day designed to boost students' statistical literacy.

Fun Fact: Did you know there were about 168 million women living in the United States – 50.5 percent of the total population – in 2021?

Women's History Month

Our new resources highlight women's rights issues and statistics like the total population of women in the United States, the percent of women working in STEM (Science, Technology, Engineering and Mathematics) occupations and more. What better way to celebrate this month's special events?

New Women's History Month Fun Facts! Did you know there were about 1.7 million more females than males ages 85 and older in the United States in 2021? This new SIS resource offers students fascinating facts about U.S. women.

Learn More

Women's Roles in Antebellum America

Share our history activity that examines an 1850 Census questionnaire and 1851 political cartoon to help students understand challenges women faced during the antebellum period (1832-1860).

Learn More

For men's History Month and women's Day, we have a brand new **Fun Facts Game**! Students can review the **Fun Facts** game to test their knowledge of the achievements of U.S. men and women.

Learn More

Ambassador Tip: Share this math joke with your students!

What do you get when you take the sun and divide its circumference by its diameter? (A: Pi in the sky)

Celebrate Pi Day – March 14th!

Be sure to use our math activity, [Comparing Scientific Notation](#), to spark middle school students' curiosity about this fulfilled math holiday. (Hint: You may want to sweeten the day by adding some pie to the equation!) Students can use population data to read and write numbers in scientific notation and compare that data for states and decades.

ASA EDUCATION RESOURCES

By Kimberley Glascoe, U.S. Census Bureau Statistics in Schools Program

Did you know Texas had the most amusement parks in 2020? Or that there were 441 ice cream and frozen dessert makers in the United States in 2019? Summer is here and now middle grade teachers can add another digital resource to their students' summer learning toolkit: a variety of challenging online Kahoot! games from the U.S. Census Bureau's Statistics in Schools (SIS) program. These games can help your students beat the summer slide by exploring kid-friendly topics like U.S. holidays and observances, businesses, history, and the diverse makeup of our country through real-life data.

These educational games were designed to help boost the statistical literacy of K-12 students while introducing them to working with and understanding Census Bureau data that will help sharpen their data literacy skills before returning to school in the fall. These skills help prepare them for future learning and careers in an increasingly data-driven world. Educators can use these challenges and other free SIS resources to supplement what they are reviewing in summer school, or send home with students to encourage learning over the summer break.

Many of these data-driven games align with common student learning objectives, such as reading and
